

	CAT = Countryside Access Team	<u>Nov.'19 ProWs observations</u>	
	PRoW= Public Right of Way		
	* Width specified by the Inclosure Act		
<u>127/</u>	<u>Where</u>	<u>Observation</u>	<u>Notes</u>
BW 1 *12'	Roke towards Warborough	Good	Hugely improved since the barbed wire was removed, thank you to Nigel Hicks (farm manager).
FP 2	Rokemarsh to Roke - driveway	Good	
	- behind hedge	Narrow but passable	Will keep an eye on hedge
	- field	OK	
	- path by orchard	Very difficult to pass at one point, bramble hedge needs cutting back	Early '20 - hedge trimmed back.
	-top of Chapel Lane	OK	
	-Chapel Lane	OK	
FP 3 *6'	Roke to Berrick - up to the footbridge	OK, some overgrowth needs trimming	Will do over winter.
	2nd section around allotments	OK on west side by stream, overgrown down north side	In the spring, we cleared & took down some small branches by the stream. See 1) below for recommendations for north side.
		Tree down on 02/11/19	Countryside Access Team at OCC informed. No response so parishioners took 'direct action'.
BW 4 *12'	Green Lane across field towards Warborough	OK	Unadopted road to field.
		Top of Green Lane needs undergrowth cut down.	See 2) below.
		Good	

FP 5 *6'	NW from Parsonage Farm to BW4	OK, footbridge needs repairing. Not 6' wide.	The Countryside Access Team at OCC informed in June '19 about bridge - nothing done so far.
			The Chilton Society installed 4 new kissing gates last year which have been a huge improvement.
FP 6 *6'	Old Post Office to St.Helen's Church	Behind the Old PO, it needs a little snipping & is less than 6' wide.	We'll snip at some point.
BW 7	Hollandtide Bottom	Needs under & overgrowth clearing at some points, particularly between the overhanging branch and the two oaks which mark the parish boundary.	See 2) below.
FP 8	Top of Green Lane towards Lane End Farm	Good, some minor snipping required on footbridge	We'll snip at some point. Way marker put up last year, path not well known & state of Newington stretch not checked.
FP 9	Manor Farm towards Lonesome farm	Impassable	See 3) below.
FP 10	Rokemarsh to Benson	OK	Access to Benson will be impacted when development on Ben 3/4 starts, OCC Countryside Access Team have been informed.
1)	FP3 between Allotments and West End Cottage, the original hedge has now grown very high and is inundated with bramble, hawthorn and that ivy like creeper that The worst stretch is the first 20' from the road which is barely passable. Legally this path should be 6' wide. Towards the stream end there is a tree with a branch Feb.'20 - Parish paid for contractors to widen the path and cut the hedge down. Many Thanks.		
2)	BW4 & BW7, top of Green Lane and Hollandtide, the main problem on Hollandtide Bottom are the sides consisting of bramble, hawthorn, ground elder and particularly with nettles and the horses have churned up the mud in the middle making it very difficult for walkers.		
3)	FP9 crosses Manor Farm and joins 307/10 (Newington) at the Hare Hall Farm boundary where it leads to Lonesome Farm on Hollandtide Lane. Both these paths are gates that are difficult to open and close and is very badly marked. At the boundary with Hare Hall Farm the stile has been removed and, if you can climb over, leads Walkers from Lonesome Farm to Berrick have been using the side of the field which has no right of way and diverting round to the Chalgrove Road to avoid Manor
